TOXICOLOGY

Volume Contents

Volume 101 (1995)

Special issue: Guiding principles for the use of biological markers in the assessment of human exposure to environmental factors — an integrative approach of epidemiology and toxicology

Guiding principles for the use of biological markers in the assessment of human exposure to environmental factors: an integrative approach of epidemiology and toxicology
WHO Regional Office for Europe (Bilthoven, The Netherlands) 1–10
Levels of pollutants and their metabolites: exposures to organic substances
J.C. Larsen (Søborg, Denmark) 11–27
Use of human hair as a biomarker in the assessment of exposure to pollutants in occupational and environmental settings
V. Bencko (Prague, Czech Republic) 29–39
DNA and protein adducts
K. Hemminki, H. Autrup, A. Haugen (Huddinge, Sweden; Aarhus, Denmark; Oslo, Norway) 41–53
Early biochemical markers of effects: enzyme induction, oncogene activation and markers of oxidative damage
H.E. Poulsen, S. Loft (Copenhagen, Denmark) 55–64
Biokinetics and stability aspects of biomarkers: recommendations for application in population studies
A.M. Bernard (Brussels, Belgium) 65–71
Validity criteria for the use of biological markers of exposure to chemical agents in environmental epidemiology
P.A. Schulte, G. Talaska (Cincinnati, OH) 73–88
Design of studies for validation of biomarkers of exposure and their effective use in environmental epidemiology
J. Wahrendorf (Heidelberg, Germany) 89–92
Application of biological markers in cancer environmental epidemiology
B.J. Trock (Washington, DC) 93–98
Application of biomarkers in population studies for respiratory non-malignant diseases
P. Paoletti (Pisa, Italy) 99–105
Biomarkers of exposure versus parameters of external exposure; practical applications in estimating health risks
M.M. Verberk (Amsterdam, The Netherlands) 107–115
Application of biomarkers in heavily polluted industrialized areas of countries of Central and Eastern Europe
G. Motykiewicz (Gliwice, Poland) 117–123

Review Article

Mutations in the *ras* proto-oncogene: clues to etiology and molecular pathogenesis of mouse liver tumors
(A review, including a comprehensive data base extracted from the published literature)
R.R. Maronpot, T. Fox, D.E. Malarkey, T.L. Goldsworthy (Research Triangle Park, NC) 125–156

0300-483X/95/$09.50 © 1995 Elsevier Science Ireland Ltd. All rights reserved

The tolerability and pharmacology of interleukin-6 administered in combination with GM-CSF or G-CSF in the rhesus monkey (**No significant toxicological effects were detected**)
L.A. Myers, J.T. Boyce, R.L. Robison (East Hanover, NJ) 157–166
Comparison of efficacy of two oximes (HI-6 and obidoxime) in soman poisoning in rats (**HI-6 has superior antidotal properties**)
J. Kassa (Hradec Králové, Czech Republic) 167–174

Contents of journals relating to toxicology 175–176
